# General Industry & Manufacturing

## *Profiting Through Ergonomics*

*Workplace injuries are preventable. ETC helps manufacturing organizations identify ergonomic risk, implement proven solutions, and build lasting programs that protect workers and improve productivity.*

### Distribution of injuries and illnesses by event or exposure

*Incidence rate per 10,000 full-time workers*

Source: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating state agencies. Rates =  $(N/EH) \times 20,000,000$  per 10,000 full-time workers.

*"I personally have worked with ETC since the early 90's. Since that time, I have worked for several different companies, Scott Paper, Meade Westvaco and now Constellation Energy. During my service with these companies, I have asked ETC to provide a variety of ergonomic services to the various operations within those companies. Services ranged from training to site assessments to working with ergonomic committees to help select ergonomic tools and equipment. They provide excellent work, were flexible in customization to our particular needs, reliable, and provided competitive pricing."*

Lou Rotella, Director Safety and Health, CGG
